

Product Bulletin

2" x 2" Perforated Angle

To our Valued Customers:

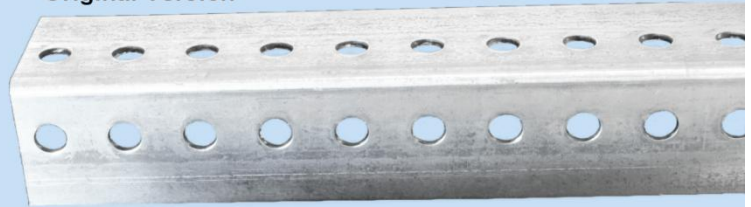

Helton Industries is pleased to announce improvements to our 2" x 2" Perforated Angle. Based on customer feedback, we have moved the holes closer to the edge of the flange. The new hole locations eliminate the need for trimming corners when mounting angled gusset pieces. Hole dimensions remain unchanged and are oversized for 3/8" bolts. Hole spacing also remains the same at 1" on center.

2" x 2" Perforated Angle is available in both 12 gauge and 13 gauge, in 8' and 10' lengths. Standard bundle sizes are 100, 250, and 500 pieces. The new version is available immediately.

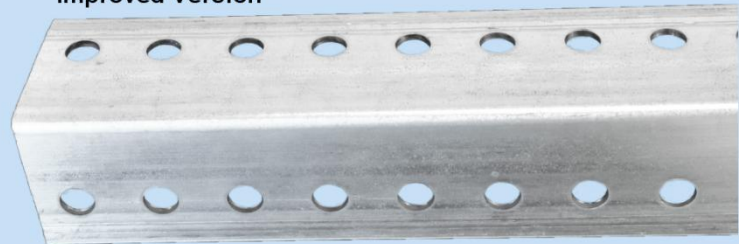

Helton Industries is a market leader in the manufacture and supply of Overhead Door Hardware, Springs, Windows, and Accessories.
